PROFESSIONAL SUMMARY

React.js / Next.js Developer with 4 years of professional experience designing, building, and optimizing high-performance web applications across B2B SaaS, enterprise, e-learning, healthcare, and e-commerce domains. Adept at crafting robust dashboards, secure authorization systems, real-time communication modules, full-stack integrations, and modular, reusable frontend architectures using JavaScript, Node.js, and modern state management systems.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Shadcn/UI, Radix UI
- **Backend & APIs:** Node.js, Express.js, REST APIs, WebSockets, JWT Authentication
- **State Management:** Redux, Redux Toolkit, Redux Saga, RTK Query, TanStack Query, Zustand, Redux Persist
- **Forms & Security:** React Hook Form, Formik, Yup, Zod, Refresh Token Auth, OTP & Cookie-based Auth, RBAC
- **Real-Time & Media:** Socket.IO, React Player, HLS Streaming, Bunny Stream CDN
- **Tools & Deployment:** Stripe, Recharts, Leaflet, i18next, Git, Chrome DevTools, AWS CodeDeploy, AWS EC2, PM2

PROFESSIONAL EXPERIENCE

Applaunch Technologies Pvt. Ltd. | Bengaluru, India

React.js / Next.js Developer — November 2022 – Present

- Architect and engineer scalable enterprise web platforms using React.js, Next.js, Node.js integration, and TypeScript in Agile environments.
- Reduced initial page load times by 40% and improved Web Vitals across client portals through code-splitting, route lazy loading, and SSR/ISR strategies.
- Design modular, reusable UI components leveraging Tailwind CSS, Material UI, Styled Components, and Shadcn/UI.
- Integrate REST APIs and WebSocket layers using Redux Toolkit, RTK Query, TanStack Query, and Axios, optimizing caching to cut redundant network requests by 30%.
- Implement end-to-end security workflows with JWT access/refresh token rotation, OTP validation, and fine-grained Role-Based Access Control (RBAC).

FEATURED PROJECTS

KORB – B2B Wholesale & Retail Commerce Platform (*React.js Project*)

Tech Stack: React.js, Redux Toolkit, RTK Query, Node.js REST APIs, Tailwind CSS, Material UI

- Architected dual Super Admin and Business Admin dashboards for a wholesale/retail platform managing products, listings, multi-warehouse stock, and corporate accounting.
- Built full analytical reporting dashboards using Recharts to visualize real-time sales trends, reducing chart render times by 50% through memoization.
- Designed and implemented product catalogs, nested shipping status tracking, and inventory mutation workflows.

ARK CLAM – Enterprise Learning Management Platform (LMS) *(Next.js Project)*

Tech Stack: *Next.js 15, React 18, Node.js, Redux Toolkit, RTK Query, Socket.IO, Stripe, HLS Streaming, EC2, PM2*

- Developed a multi-tenant B2B LMS comprising an Admin Dashboard and Employee Portal for interactive video onboarding and certification tracking.
- Built user-facing elements using Next.js App Router and integrated automated recurring subscription flows with Stripe payments.
- Implemented interactive video-on-demand playback via React Player and HLS streaming with progress tracking, alongside real-time Socket.IO notifications.

ExitUs – Digital Obituary Platform *(Next.js Project)*

Tech Stack: *Next.js 16, React 19, TypeScript, TanStack Query, Zustand, Tailwind CSS, Shadcn/UI, Zod*

- Constructed a memorial platform facilitating multi-lingual notice generation, geolocation features, and interactive partner search criteria.
- Built an obituary generation wizard utilizing complex multi-step state management with React Hook Form and Zod, improving wizard completion rates by 25%.
- Utilized TanStack Query for performance-oriented endpoint caching, significantly reducing backend request loads.

ZimmereiFrank – Construction Project Management Platform *(Next.js Project)*

Tech Stack: *Next.js 16, React 19, TypeScript, TanStack Query, Zustand, React Hook Form*

- Crafted an operational scheduling system replacing physical spreadsheets with centralized monitoring, time-card logging, and file management.
- Built highly responsive role-based dashboards specialized for field engineers and administrative controllers.
- Developed core project planning timeline interfaces and integrated on-site responsive time sheets.

ADDITIONAL ENTERPRISE PROJECTS

- **ArticPrint (React.js):** Engineered a live drag-and-drop T-shirt customizer using React-Konva with active canvas image scaling and layer configuration.
- **MRI Essentials (React.js):** Built educational premium subscription pathways and dynamic card layouts utilizing React.js, Redux Saga, Node.js endpoints, and Stripe.
- **WILM & Pool Wagers (React.js):** Created video nested layouts, admin dashboards for tournament wagering logs, and operational configuration forms.
- **Wexxl & Atma Admin (React.js):** Designed dashboards for insurance coverage management and analytical questionnaires with integrated filters.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Aditya Engineering College | Kakinada, Andhra Pradesh, India
